

# Energy Equipment Controls Newsletter September 2018

## Here's what's new at EEC:

Energy Equipment Controls LLC is proud to launch our newly redesigned website!! We have redesigned it with you in mind, simplifying navigation, building a responsive category layout for all platforms and providing more resources and information on our products and services. If you have any questions or feedback you would like to share with our team, please do so by filling out the form on our [Contact Us](#) page.

## Industry News:

**Meet Resideo:** Honeywell's New Stand-Alone Smart Home Spin-Off!! By the end of 2018, Honeywell's homes and ADI Global Distribution businesses will be spun off into an independent, publicly traded company, and the new company will be named Resideo. Together, these bring about thoughts of safety, comfort, security, strength, reliability and trust - in a name that expresses our identity as a technology company. These are timeless messages that are core to the Resideo business, as they express our focus on the home and our commitment to keeping the users of our products safe and comfortable.

## Tech Tips:

### ECM, VFD and Inverter - What's the Difference?

Have you ever been confused about these 3 devices? What is the first thing you should know as a technician about an ECM Motor? Are you familiar with how a variable frequency drive can safely change the speed of a motor? These technologies are constantly evolving and changing and while they may be similar, the different names describe different types and applications. Please visit us at your website to find out more about this month's tech tip!
